Dear Hiring Manager,

I am interested in an Architectural Designer position with your team. My background includes single-family and multifamily residential design, interiors, and small commercial projects, with professional experience in Venezuela, Chile, Spain, and the United States. I am based in McAllen, Texas, and am available for opportunities in the Rio Grande Valley or remote work in the United States.

I use AutoCAD, Revit, and SketchUp to develop designs, drawings, and 3D models. At KTIPIO Arquitectura, my work included single-family homes, summer residences, and a restaurant project. At GDN, I developed architectural designs and coordinated Revit drawing sets for institutional projects. My work at TinyTech included modular tiny-house systems, construction documentation, and assembly instructions.

My experience also connects design with production. From May 2025 to May 2026 at Arka Home Solutions in McAllen, I designed kitchens and closets and produced their cabinets. I also prepared fabrication drawings and developed protocols for cutting, assembly, and installation. Since June 2026 at LIMON Masonry, I have created SketchUp models and calculated square-footage takeoffs for CMU, brick, stucco, and EIFS to support construction bids.

I hold an architecture degree from Universidad Central de Venezuela and have BIM modeling training from IBIM Chile. I can contribute to design development, architectural drafting, and documentation while bringing practical knowledge of cabinetry and materials.

I would welcome the opportunity to discuss your projects and review relevant examples from my portfolio. Thank you for considering my application.

Sincerely,

Francisco José Padrón Silva
